Respectfully submitted,

H. B. SWETT,

Town Clerk.

Report of the Superintendent of Schools and Superintending School Committee of the Town of Waterboro Maine

For the Year 1909-10.

GEORGE N. BROCK, Chairman,
W. LESLIE GOODWIN,
JAMES A. ROBERTS,
Superintending School Committee.

ERNEST G. KNIGHTS,
Superintendent of Schools.

REPORT.

To the Superintending School Committee and to the Citizens of the Town of Waterboro:

In compliance with the requirements of the Statute, I have the honor to submit herewith my report to you relative to the condition of the schools in town for the past year.

In giving information in regard to the work which has been performed, and the changes effected during the year, we can speak for the most part only in general terms, for much of the work is of such a nature as to render it impracticable to give it with any minuteness of detail. We hope, however, to be able to present to our fellow citizens of Waterboro a report that shall not only be readable, but one that will convey to all the facts that exist in relation to our schools, and especially those facts that relate to the financial end of the school department of our government.

At the commencement of this report, I wish to return to the Members of the Superintending School Committee of Waterboro my sincere thanks for the honor they did me in electing me to the highly important office of Superintendent of Schools of Waterboro. At their first meeting, they vested me with ample authority to properly conduct the schools, and if there has been one instance of failure in the management of our schools during the past year, it should be charged to me. I am pleased to be able to report that there has existed perfect harmony at all times between the Members of the Committee and the Superintendent, and that the object all appeared to have in view was the improvement and the advancement of our schools to a higher plane than ever reached before.

I am pleased to report that the health of the children has been excellent throughout the town, and that the attendance has been excellent for the year. I have been forced to require the services of the truant officer in a few instances, but in nearly every case of truancy, I personally endeavored to secure a better school attendance, and the truant officer was called only when other methods failed. There are yet, as there has ever been, a few who appear to feel that it is a source of benefit to allow their children to remain away from school. I am firmly convinced that the ancient axiom that "like begets like" has an application in this instance, and that the victims of ignorance feel that they are bound to secure a goodly number of their calibre for the next generation. With parents of even ordinary intelligence, I have not been troubled in this respect. Ignorance, idleness, poverty and vice are, and will continue to be, closely associated.

COMPLAINTS.

I am pleased to report that there have been but a small number of complaints against teachers received during the year, and many of these I found on examination to be anything but honest. A few complaints were received from East Waterboro during the Spring term, but as those complaining had signed the petition that was circulated, we felt that they were receiving just what they should have anticipated, and that they had but little excuse for complaining. The greater part of the other complaints came from parents whose children had been compelled to obey the rules of the school, and to them we extended but little sympathy. The Committee have a right to expect parents to see that their children attend school regularly, and obey the rules of the school. They are not justified in their plea that their child is not learning well if they persist in advancing excuses to keep them away from school. They should also visit the

school in their district and if the teacher is doing her duty, encourage her. At any rate, do not pass judgement upon her mode of instruction, which you have never examined.

FINANCES.

We are pleased to report that we have been able to maintain thirty weeks of school during the year, have granted a small increase of wages to the teachers in districts 1, 9, 12 and 16, and have a nice balance on the right side of the ledger.

We have made quite a few repairs on the inside of the building in district 9; have newly shingled the house and shed in district 14; have shingled the houses in districts 4 and 7 on one side; have given the house in district 16 two coats of paint on the outside, and have caused to be erected a new outbuilding in district 12 in which the sexes are segregated. We have, also, had a new fence erected about the building in the latter district. I am also pleased to report that we have an unexpended balance in this department.

We have been compelled to overdraw the appropriation for text books for the sufficient reason that the books were required. We have completed the introduction of the Heath reader, adopted some time ago, and other books required for the common and high schools have combined to produce the above result. We have endeavored to be economical, but we cannot afford to be parsimonious when books are required. We have made no changes in the textbooks in use at the commencement of the year. Colburn's arithmetic, whose true value is known by all, has been added to the high school course, and Greenleaf's "First Lessons in Numbers" is being used by the little folks in the common schools. All new books that have been sent to the different schools have been numbered and charged to the Teacher taking them away. All books distributed during the year have

been accounted for, and I feel that the continuance of this system will tend to decrease the amount required for this department in the future. Fifty dollars per year should be sufficient to supply our book needs, and with the school officials and teachers united in the determination that our books must be properly cared for, this happy result should not be long delayed.

Parents should appreciate the fact that the books are the property of the town, and should be treated as other borrowed property should be treated.

REPORT BY DISTRICTS.

District 1:—The school at Waterboro Old Corner has been taught by Ruby M. Abbott, of this town, during the entire year. The teacher was very industrious, labored hard for the advancement of her pupils, and was rewarded by a high degree of successfulness. The scholars seemed deeply interested in their studies, made marked improvement in every branch pursued, and good order pervaded the school. Miss Abbott is now enrolled at the Gorham Normal school and is, apparently, neglecting no opportunity that will better fit her for her chosen calling.

District 4:—During the Spring and Fall terms, the scholars in this district were transported to Dist. 16, No. Waterboro. Elinor M. Chadbourne, a graduate of our High School, was employed to teach the Winter term and the complete harmony that has existed between teacher, parents, and pupils highly attest the value of the school. The number of pupils in this District is quite small and we have been able to secure transportation for them at a price much below the cost of maintaining a school in the district.

District 5:—Ethel L. Gammon has taught the school in this district for several years. She is a graduate of our High School, possesses a State certificate for teachers, and

is one of our most efficient instructors. Her methods of imparting instruction to her pupils are distinctly modern, and though the school was small in numbers, yet excellent results were obtained.

District 6:—Edna M. Kimball, another graduate of our High School, taught the three terms in this district and has worked hard to please parents and pupils. Notwithstanding the fact that the number of pupils in the district is small, the teacher appeared at all times to be able to "keep busy," with the result that good improvement was made in all branches taught. Like Miss Abbott, Miss Kimball is now enrolled at Gorham Normal school.

District 7:—Miss Helen I. Hopkins, of Portland, has been in charge of the school in this district during the year. Though inexperienced in the art of teaching, we soon discovered that she was fast developing into an excellent instructor, and we are pleased to note that our good opinion of her efforts and the results obtained during the year, is largely shared by the parents of the district.

District 8:—Natalie N. Knight, a graduate of the Waterboro High School, and a former successful teacher in our schools, has been with the school all the year. She has a dignified and commanding appearance in the schoolroom; is mild and steady in her government, and does not fail to win the love and respect of her pupils. Her method of imparting instruction was very good, and though she labored under the disadvantage of a poor schoolroom, the scholars made marked progress.

District 9:—The Spring term of school in this district was taught by Miss Edith C. Abbott, a graduate of Waterboro High School. Miss Abbott had previously taught in this town and given excellent satisfaction but she was unable to repeat her former success in this district.

This school for some time has been a source of trouble to teachers and others and the Committee soon came to

realize that the only way the trouble could be overcome was by the employment of a teacher who possessed, what Miss Abbott did not,—the physical ability to "knock out" the insubordinates. That the Spring term was not more successful was not the fault of Miss Abbott. She passed the Spring examination with high rank, and she gave her best efforts to the success of the school, but parents, instead of correcting their children at home, preferred to condemn the teacher.

Miss Estella H. Roberts, a graduate of our High School, who had taught successfully the Spring term in District 15, was employed to teach the Fall term, and it required less than one week to demonstrate to all that the Committee had made no mistake in their selection. Pupils looking for trouble were most graciously accommodated, and upon the occasion of my first visit to the school I was greatly pleased with the complete transformation that had occurred. The pupils were studious and quiet, and the recitations were conducted in an excellent manner.

Miss Roberts was again engaged for the Winter term and I am pleased to report that the success that crowned her efforts during the Fall term was continued.

District 10:—The school in this district has been taught during the entire year by Miss Florence E. LaFon, a graduate the Brunswick, Maine, High school, and a former teacher of the public schools in the towns Brunswick and Durham, Maine. Miss LaFon has a way of her own in imparting knowledge, one that is strictly up to the times, and no pains have been spared by her to render the school profitable and pleasant to her pupils. The school was systematically conducted and the closing examinations showed the school to be in a very flourishing condition.

District 12:—Florence M. Cluff, another graduate of our high school, and a teacher of much experience, has taught the school in this district during the past year, and given

the usual satisfaction. The parents, with few exceptions, always co-operate with the teacher in promoting the interests of this school, which makes it one of our best schools. The teacher has been troubled in one instance by an unruly pupil bent on disturbing the school, but with such excellent facilities for having such pupils educated at the Reform school, it may be here recorded as a fact that the school will not be further troubled in this respect for any extended period of time.

District 14:—Estella H. Roberts taught the Spring term in this district and gave excellent satisfaction to all. Shortly before the close of the Spring term, the Thurston family left the district and as but two scholars remained, the Committee voted to transport them to District 16, for the remainder of the year, which has been done.

District 15:—Reta J. Swett, another graduate of our high school, taught the Spring and Fall term in this District and is in charge of the Winter term, which is now in session. This is one of our smaller schools, and, naturally, the same degree of success cannot be obtained as in a larger school. Loss of numbers means loss of interest. Miss Swett has worked hard for the success of the school, but we feel that the pupils will obtain a greater benefit if transported to the school at Chadbourne's Ridge.

District 16:—Miss Myra H. Foss, of Hollis, has been in charge of this school during the past year, and though there have been a few complaints received, we are satisfied that much progress in the right direction has been made. The Superintendent has visited the school at least twice each term, and on each occasion found the scholars industrious, the order good, and the recitations showing much time spent in their preparation. I am willing to be convinced that the school was not highly successful, but I hope that I may be allowed to insist that proof on this score shall come from those who have visited the school at least once during the year.

WATERBORO HIGH SCHOOL.

The feeling now appears general throughout the town that the Waterboro High School is a necessity that we cannot, under any circumstances, dispense with. Eight of the young ladies teaching our common schools during the year are graduates of the school, and it gives me pleasure to report that their work has been of the best. Few complaints have been received against their schools and all have maintained excellent discipline.

The Spring term of the High School was taught by Ernest M. Lovell, a young man well equipped for the position, with the exception that he over-estimated the value of patience. For some time, two or three young men, who could not come to realize what they were there for, persisted in disturbing the school but, instead of applying the "straightening" process that was sorely needed, Mr. Lovell chose to allow himself to be abused. It required but a short time to locate the source of the trouble and the suspension of two of the students put a quietus to this relic of barbarism. At the close of the term, five young men and women were graduated and the manner in which each performed the part assigned amply demonstrated the fact that the usual preparation had been given them.

During the Summer vacation, the members of the Committee decided that a change in the management of the school was demanded, and from a list of fifteen applicants, they selected Harry L. Horne, of Norway, Maine, a young man who came well recommended by school officials, business men, and others. That he has been successful in putting the school on a substantial base is admitted by all. The discipline has, at all times, been excellent, and Mr. Horne has brought that energy and life into the school that is indispensable to its success. He is not only master in theory but in fact. The class entering last Autumn num-

bered nine and are receiving an excellent training in the school. Mr. Horne understands his business well and displays great ability in imparting instruction. His method of solving questions by analysis is clear, expeditious and comprehensive, and the visitor to the school will find all classes acquitting themselves finely.

We have revised the course in the school and the Waterboro High School is now an APPROVED school and on the list of GOOD schools in the State of Maine. We shall endeavor to keep it there and the citizens of this town should insist on the present standard being maintained.

RECOMMENDATIONS.

The sanitary conditions surrounding our school buildings have long been a menace to the health of our children. We teach the principles of hygiene in our schools, but we have long neglected to apply them about our school buildings. Shortly after my election and before the commencement of the Spring term, I visited every school building in town and personally attended to the cleaning up of the out buildings, and arranged for the cleaning of the school rooms. Before the commencement of the next term, I advise that every school room in town, that will be in use, be thoroughly whitewashed and painted.

The average attendance in Districts 4, 5, 6, 7, 14 and 15 has fallen below eight, the number required by Statute and, consequently, the school in these Districts cannot be continued without a vote of the town to this effect. In a few of these Districts a school can be maintained at less expense than transportation would require. I trust the citizens of this town will authorize your Committee to continue to maintain a school in these Districts if at any time during the year it shall be found profitable to do so.

The members of the S. S. Committee of Waterboro

have for years been compelled to serve without pay, principally for the reason that the town has neglected to make any provision therefor. I feel that this is entirely wrong and that we should provide a remedy at our first opportunity. The members of the Committee in the performance of the duties of their office are compelled to absent themselves from their general duties three or four days in each year, and I feel that justice demands that they be reimbursed for their loss of time. A small appropriation would be sufficient for this purpose and I hope that my townsmen will decide that the wrong that has been done this class of public servants shall no longer continue.

CONCLUSION.

In concluding this report, I may be excused for once more expressing my thanks to the Committee that honored me, and I wish to acknowledge the many kind words that have been spoken in regard to my efforts. My only regret is the possibility that I have not deserved all the good words that have been spoken. I have honestly endeavored to practice economy where economy was profitable, and to serve you in the way I would like to be served. I have supported your teachers at all times when they needed my support, for I feel that no school can obtain any great degree of success without the earnest co-operation of all persons connected therewith.

I am pleased to note the interest parents have taken in our schools during the year just closed, and as a shining example of this fact, attention should be called to the school at East Waterboro, District 9, where over fifty visitors were recorded during the Fall term.

I trust that I may be allowed to admonish parents that they are the natural instructors of their children. They, alone, are responsible for the their intellectual and moral

growth. They employ teachers to accomplish a part of their own work, and should assist them in performing their task. It is too often the case that parents commence a warfare against the teacher, the children catch the same spirit, with the result that the labors of the best teachers are neutralized by such wicked and ignorant interference. To reach the highest attainments of the schoolroom, therefore, the influence without must be in harmony with that within.

Our teachers should be admonished that because they have successfully taught a few terms of school, they will not be justified in assuming that their future success is assured and that it will not be necessary for them to make an effort to keep abreast of the times. The time is not far removed when GOOD teachers will be able to command a large salary, but those of medium ability will find it difficult to secure positions. A higher test will be required of teachers than formerly, for the reason that the raising of the standard will require it.

Our townsmen will note that we have erected flag-staffs before the common and high school buildings at Waterboro Center, and we hope that before the close of the coming year our flag will be found floating before every institution of learning in Waterboro.

I have collected from the town of Limerick the sum of fifty-four dollars that has been due for a long period of time, and have collected from the town of Lyman the sum of eighteen dollars for tuition of Cluff children in District 8.

I have appended hereto an itemized account of all expenditures for which I have been reimbursed by the town, and I shall be happy to enlighten any person who shall desire any further information in regard to expenditures made in this department during the past year.

ERNEST G. KNIGHTS,
Superintendent of Schools.
