Report.

I. Edward E. Libby, Auditor of Waterboro, certify that I have made a careful audit of the accounts of the Selectmen and Treasurer and find them correct. The Selectmen have shown me a bill for each order drawn and the

Treasurer has shown me a cancelled check, a receipt, or other proof of payment for every order paid.

Large bills in the Snow, Poor and Incidental Departments have caused an increase of the town debt of \$1,744.33 as shown by Treasurer's report. \$300. paid for insurance on the new school building caused the overdraft in the Inci-

There is due from the State \$96.00 on account of Pensions and Mothers Aid and Dayton owes for the expense of

Alphonso J. Hill.

The debt of the town, outside of school bonds, is: Note to May Andrews Roberts ______ 700 00 In the school building department, the following is a correct statement; Received from sale of 251 town bonds \$27,000 00 . 27,022.09 Total The Treasurer has shown me paid checks for26,973 83 His Bank statement shows, Balance..... Respectfully submitted,

Edward E. Billy,

School Department.

Superintendent's Report.

To the Superintending School Committee and Citizens of the Town of Waterboro:

It is my pleasure at this time to submit for your consideration my third annual report of the condition and needs of the schools of Waterboro.

Generally speaking, our past school year has been marked by steady progress and success. There have been a few changes in our staff of teachers, owing to resignations, but for the most part we have practically the same corps as in the past few preceding years. A constant change in the teaching force of a town tends to weaken a school system. However, where changes have been made the work has gone on in a progressive and efficient manner.

The elementary schools opened on the first Tuesday in Sentmeber and during the fall we maintained a term of fifteen weeks, during which time attendance was very good and the pupils accomplished work of very good quality. The winter term has been somewhat broken by bad weather and illness, but there has been no serious slump in results attained. I feel that our schools will compare very favorably with those of other towns

throughout the State.

The new school building at South Waterboro was opened for high school purposes on October ninth and work there was taken up in a manner worthy of commendation. At the time the high school opened the building was still in the process of construction and there was necessarily a certain amount of noise and confusion which could not be avoided During this period there was a fine spirit of co-operation between all concerned and the progress of the school was practically unimpeded. Our high school offers two courses of study, namely: the college preparatory and the English or general course. These courses have been approved by the State Department of Education and the school has been rated by them as "A class" for tuition purposes. Mr. Josiah W. Taylor, Agent for Secondary Education, has visited the school and was very favorably impressed by the condition in which he found it. Our high school teachers are both college graduates and have had definite training for the subjects they are teaching. We were fortunate in securing as principal a man of several years' experience. It has been very largely through his experience and executive ability that the school has been well organized and has been maintained from the first in a very efficient manner. When one considers the fact that the school was made up of pupils coming from several different schools, pupils who had been taking various courses, it becomes obvious that the work of organization was by no means easy. The town is very fortunate in the excellent beginning which has been made. For a more detailed report of the high school I would respect-

fully refer you to the report of the principal.

The graded school of the village entered the new building at the opening of the winter term in January. Two rooms on the first floor are used for this purpose. It seems hardly necessary to point out the advantages derived by these schools by being housed in a modern, up-to-date building. Under the new conditions we may hope for better results. There is still a vacant room on the first floor which can be used for another school as soon as occasion demands. It is hoped that the town will, wherever possible follow a program of consolidation, thus bringing as many pupils as may seem feasible under one roof. The establishment of a junior high school would also be another progressive step in advance. Under such a scheme of organization the three rooms on the lower floor would be used for the first six grades of the elementary course and one room on the second floor for the seventh and eighth grades, which would become the first two years of the junior high school. I would also suggest in this connection the advantage of bringing upper grade pupils from the rural schools to the South Waterboro school. This would be advantageous both to the rural schools and to the papils. Our rural teachers now have overcrowded programs and it is absolutely impossible to devote a sufficient amount of time to the subjects taught.

Although work of good quality is being done in the funda mental subjects of the curriculum, there are certain special subjects which have been neglected. As one of the most important of these subjects I would mention music. This subject to be properly taught requires a music teacher who can give definite instruction and supervise the work of the regular teachers. At the present time there is a teacher of training and experience available for this position and I would impress upon the voters the desirability of taking advantage of this opportunity.

It has now become a well recognized fact that the physical welfare of pupils is a very important factor in their school work. Many towns throughout the State have already introduced medical inspection into their school systems. During the fall term, Miss Helen Dunn of Sanford, in connection with her work as nurse for the York County Health Association, made an inspection of all the Waterboro schools. She has given me the following report of the examination which she made at that time: Number of pupils examined, 120; number with defects, 101; number without defects, 19; number of pupils having normal weight, 75; number below weight, 28; number above weight, 17; number with defective teeth, 94; number with defective tonsils, 19; number with defect of nose, 2; number with defective vision, 19; number with defective hearing, 3; number with pediculi, 4; number with skin defects, 1; number with bone defects, 1.

Condition of School Buildings.

Our school buildings are in good state of repair as concerns their general condition. During the past summer a new outbuilding was erected at the Carll's Corner School, in conformity with the legal requirements for such buildings. All our rural schools now have out-buildings which meet these requirements. There is still opportunity for improvement in the matter of lighting, heating and ventilation. None of these buildings are up to standard in these respects. In the way of general repairs may I suggest that the school at East Waterboro will soon need to be painted. A new stove is very much needed at the North Waterboro school.

Needs for the Coming Year.

Although furniture has been purchased to meet immediate equipment. In the high school we have thirty class room desk chairs of modern, up-to-date type, which have proved highly satisfactory. In the assembly hall we have barely seats enough to accommodate the student body. It is necessary that more of these seats be purchased in sufficient quantities to allow the use of the hall for public gatherings. Our laboratory will need chemistry apparatus, chemicals and a chemistry table. These will cost at least \$200.00. We also need class room chairs for this room. It will also be necessary to make additions to our library. Other general needs are tables for the class rooms and furniture for the office. These things should be kept in mind in making appropriations on town meeting day at which time recommendations will be made as to the amounts of money required.

Financial.

A glance at the financial statement will show that the money appropriated last spring has been judiciously used. It will be seen that there is an unexpended balance in every account with the exception of appropriation for repairs, which has been overdrawn seventy-five cents. This does not, however, indicate that there should be any cut in appropriations. In some instances more money will be asked for. It must be borne in mind that our high school opened late in the fall, a fact which accounts for the unexpended balance in that account. It will be necessary to maintain that school next year the additional number of weeks to make up the time lost by opening so late. It should also be remembered that our teachers are not receiving salaries which will hold, for any length of time, teachers of good training and experience. Furniture for the new building has not been paid for, owing to lack of appropriation to cover the same. It will be necessary to raise money to cover this item.

It will be noticed from the financial statement that we do not receive as much money from the State under the new method of apportionment as was formerly the case. Under the present scheme all money received from that source comes in one sum

WATERBORO TOWN REPORT.

and is known as the "State school fund." This money may be used for any school purposes for which it may be needed. It is therefore necessary for the school officers to use it according to their best judgment. In connection with this new apportion ment law may I also call the attention of the voters to the provision which states that, in the future, all unexpended balances in the various school accounts must be credited to those accounts for the coming school year.

Conclusion.

During the past year there has been a fine spirit of cooperation between the citizens and those directly connected with the management of the schools. I wish here to thank those incividuals who have contributed either in service or in money towards meeting needs involved at the new building. I would also mention especially a gift of one hundred dollars and a valuable collection of books for the high school library, from Mrs. Annie King Hamilton, of Wakefield, Mass. The money gift has made possible the purchase of six chairs and a very attractive library table. Citizens are urged to visit our new building, become acquanted with our school problems, and co-operate further with the school officers in their efforts to keep a high standard in the Waterboro schools. It would be superfluous to say that we have a building of which the town may justly be proud. It speaks for itself.

In conclusion I wish to express to the superintending School Committee, to the teachers, and to the citizens of the town my appreciation for their loyalty and support during the past year

Respectfully submitted.

MAYNARD E. WRIGHT,

Superintendent of Schools.

REPORT OF HEADMASTER, WATERBORO HIGH SCHOOL

Waterboro, Maine, Jan. 31, 1923.

To the Superintendent of Schools:

My Dear Mr. Wright: It is with the greatest of pleasure that I submit this, my first, and the first annual report of the Waterboro High School.

Our school opened on October ninth with a total enrollment of thirty-four pupils and since that time one more has enrolled, making a total of thirty-five pupils.

These pupils are divided up as follows: Six seniors, eight juniors, nine sophomores and twelve freshmen.

Two courses of study are open to the pupils of the high school, the College Course and the English Course. Out of the total number of students six are taking the College Course and

29 the English Course.

As you already know, our school has been approved as a Class A high school for 1923. Whether we maintain that classification for 1924 depends upon three conditions:

First, the maintenance of experienced teachers of high standard who have graduated from a four-year college course and have obtained a degree.

Second, increased equipment.

Third, we must meet the other requirements of a Class A high school, ie, up-to-date text books, reference books, and the completion of standard requirements.

The teachers are all graduates of colleges and have degrees. It is a benefit to any school to keep its teachers sev-

eral years, if possible.

As regards equipment we are in need of a laboratory table and chemicals enough for the completion of 40 experiments by ten pupils. We also need general science equipment and a few additional laboratory supplies for physics. We also need closets in which to keep the apparatus. Then, too, wo shall need various other text books, an encyclopedia, a current newspaper and a French newspaper.

We are very fortunate to have in our village a woman, Mrs. Ruth Walsh, who is thoroughly versed in music and who is capable of directing music in the schools. She has already accomplished remarkable results and it is hoped that you may be able to secure her services for the remainder of this year and the coming year. I consider the introduction of

music in our schools a very progressive measure.

Now as to our accomplishments. In the mathematics classes we have completed half the year's work and the required subjects. In general science we have completed fifteen experiments in the laboratory and the required amount of textbook work. In physics we have already completed 25 of the necessary 40 experiments. In history we have covered 400 pages of reading matter together with 10 maps. In our community civics class we have nearly completed our present text-book.

In the first year English class the books read are Silas Marner and Julius Caesar. Practical exercises in sentence structure have been given. "The Two Years' Course in English Composition" by Hanson is the text used. The second year class has already completed "Ivanhoe" and "The Merchant of Venice." One day a week is spent in the study of structure of composition, while another day a written composition is required. In the third year we have completed "The Tale of Two Cities" and "The Autobiography of Benjamin Franklin." Two days a week are spent on the study of American Literature.

In the first year French class, 50 of the 101 required lessons in Chardenal's Complete Course have been completed.

"La Tache du Petit Pierre" and "Columba" have been read by the second year French class. Twice a week written work in French prose is required. This is indirectly a review of French grammar.

WATERBORO TOWN REPORT.

The text used in the first year Latin class is "Elements of Latin" by Dooge. Four out of a total of six required orations have been completed by the junior Latin class.

We have given five debates to which the public have been invited. We also held an unveiling, which was largely attended.

We have also a boys' and girls' basketball team, which have been fairly successful, considering that we had only a few to select from.

In our campaign to get subscribers for The Ladies' Home Journal, and thus get money for our athletic association, 46 subscriptions were sold, netting \$23.00 for the association.

We expect to organize a baseball team soon and should have a pretty good team.

We have recently started rehearsals for a Junior Play

which will be put on in March.
Our school paper, "The Waterboriain" is a huge success.

The paper is run by the students of Waterboro High School.

1 learn that we have 16 candidates for the high school next year. This will make a total enrollment for 1923-1934 of 40 pupils, which will necessitate more seats.

In closing, I wish to thank the building committee and the school board for their splendid co-operation and their support in helping me in my efforts to make Waterboro High School the best in New England.

Respectfully submitted,

B. R. GRAVES,

Headmaster.

ADVERTISING SECTION

The Citizen Movement

was created for no object other than to give the Citizens of Waterboro

God Government.

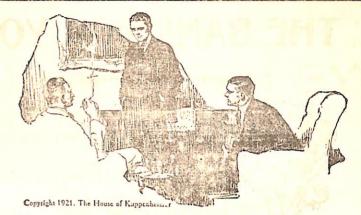

It has no favorites and intends to treat all alike.

Come to the Polls next Monday and give in your vote for the Citizen ticket from Top to Bostom.

WE THANK YOU.

Ernest G. Knights

Quality & Service Satisfaction

We believe these three Factors are absolutely necessary to uphold a successful business.

We assure you **Quality** when we sell you such standard goods as "Kuppenheimer Good Clothes," "Stetson" and "Mallory" Hats. "Interwoven" Hose, "Allen A" Underwear, "Manhattan" Shirts, "Carters Overalls, "Sweet-Orr" and Johnson" pants and other well known and tested merchandise.

We try in everyway to merit your confidence and be of Service to you.

We guarantee every article to give absolute Satisfaction without question or quibble.

NEW GOODS FOR 1923.

We shall publish March 20th. 1923 our new Price List of goods for our Spring and Summer Sale and shall make prices much LOWER than can be bought of the big chain stores, or elsewhere. Our sales from October to December, 1922 convinced us that the public appreciate a store where they can buy their goods at the right price.

We thank you.

Call for or send a postal for our NEW LIST.
